

SM-VDI SEQUENCES CODING SHEET

DATE: _____

NAME: _____

Instructions

This coding sheet is to be printed and used to record the number of valid and invalid sequences in the VDI videos (non-mastery and mastery).

1. Print 2-4 copies.
2. Watch VDI Non-Mastery Original video first and code the number of valid and invalid sequences. (There are two more videos in this category: **with subtitles** AND **with subtitles and coded sequences**. These transcribed and coded videos are for further learning.)
3. Enter the number of valid and invalid sequences in the Reliability Checker to check your reliability with a master trainer.
4. Repeat Steps 2&3 for the VDI Mastery videos.

For a reminder of what constitutes a sequence as “valid” versus “invalid” please see the VDI Tutorial Video and the Valid Sequence PDF on the VDI Tutorial Homepage.

	Valid Sequence	Invalid Sequence
Forced-Choice (FC)		
Open-Ended (OE)		
Yes/No (Y/N)
